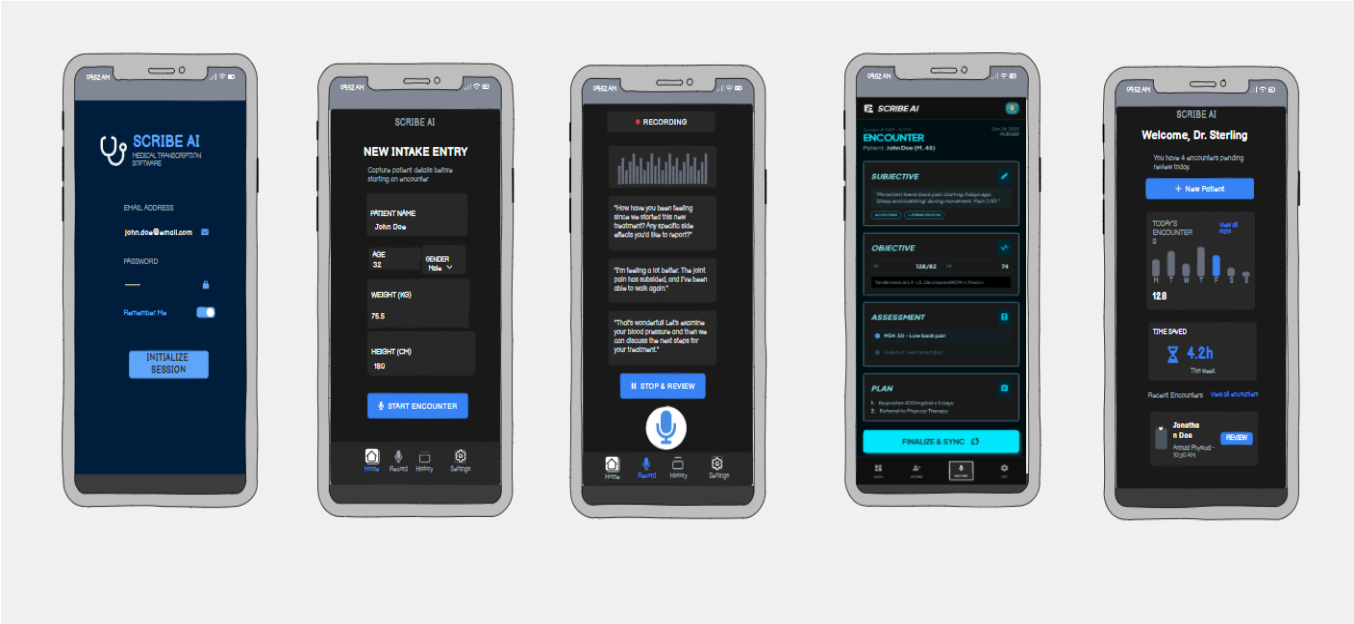
EXPERIMENT-8

NAME: NISHANI.B ROLL NUMBER: 240701363



1. Login / Initialize Session Screen

Entry point for the user (doctor/clinician)

Features:

- **Email Address field** : User login credential
- **Password field** : Secure authentication
- **Remember Me toggle** : Saves login session
- **Initialize Session button** : Starts the app session (instead of typical “Login”)
- Clean medical-themed UI (trust and professionalism)

2. New Intake Entry Screen

Capture patient details before consultation

Features:

- **Patient Name input**
- **Age & Gender selection**
- **Weight (kg) & Height (cm) inputs**
- **Start Encounter button** : Begins recording/consultation

- **Bottom navigation bar:**
    - Home
    - Record
    - History
    - Settings

3. Recording / Live Transcription Screen

Capture conversation and convert speech → text

Features:

- **Recording indicator (live status)**
- **Audio waveform visualization** : Shows active listening
- **Live transcription text** : Real-time conversation capture
- **Stop & Review button** : Ends recording session
- **Microphone button** : Primary interaction control
- **Navigation bar remains consistent**

4. SOAP Notes Generation Screen

Convert conversation into structured medical notes

Features:

- **Encounter header (patient + session info)**
- **SOAP sections:**
    - **Subjective** : Patient symptoms
    - **Objective** : Measurable data
    - **Assessment** : Diagnosis
    - **Plan** : Treatment steps
- **Editable fields** : Doctor can refine AI output
- **Finalize & Sync button** : Save/export notes

5. Dashboard / Summary Screen

Overview of activity and productivity

Features:

- **Welcome message (personalized)**
- **New Patient button** : Quick start
- **Weekly activity graph** : Encounters tracking
- **Time saved metric (e.g., 4.2h)** : Productivity insight
- **Recent encounters list** : Quick access + review option
