UID Expriment 7

Roll no:240701363 **Name :** Nishani B

To design and evaluate different application layouts using varied color schemes, typography, and visual elements, and to analyze user feedback on aesthetics and usability using GIMP.

The first UI was created with a light theme. It had a clean appearance with a white and pale green background. The dashboard displayed eco-impact information such as carbon saved, energy saved, and water saved. It also included action buttons like Track Activity and View Reports.

Features of the Design

- Light green and white color palette

- Simple and clean layout
- Dashboard cards for eco metrics
- Bottom navigation icons
- Easy readability

User Feedback Collected

Feedback was gathered from users using Google Forms.

Key Feedback Points

- UI looks clean but too plain
- Need better contrast and highlighting
- Buttons should be more visible
- Prefer a modern/dark theme
- Improve visual hierarchy

Improved Design (After Feedback)

Description

Based on feedback, the UI was redesigned using a dark theme with high contrast.

Enhancements Made

- Switched to dark background with neon green accents
- Improved button visibility and size
- Added progress indicators
- Enhanced visual hierarchy
- Introduced bottom navigation bar
- Improved overall modern look

The application layout was successfully designed and improved based on user feedback. The initial light-themed UI served as the base design, and the final dark-themed UI was developed as an enhanced version after considering user suggestions.
